

SHAPING THE FUTURE OF
NETWORK DESIGN

WIRELESS TELECOM SERVICES

MAXIMIZE YOUR BUILDING REVENUES WITH THE APEX GROUP

The Apex Group provides high quality Wireless Engineering and Construction services to all major wireless carriers nationally.

Apex has extensive experience in evaluating and marketing potential building candidates to carriers for wireless deployment such as:

- Rooftop Macro Sites
- Distributed Antenna Services (DAS)
- Small Cell (SCN)
- WiFi Networks

TO LEARN MORE ABOUT HOW OUR TOWER & WIRELESS SERVICES
CAN HELP YOUR ORGNIZATION, CONTACT US TODAY.

APEXGRP.US

SPECIFIC CHARACTERISTICS WILL DETERMINE BUILDING VIABILITY FOR WIRELESS FACILITY APPLICATIONS. CARRIERS REVIEW QUALIFIED CANDIDATES FOR THE SITE TARGETS WITHIN THEIR RADIO FREQUENCY DESIGN.

Our Group does that qualification and the carriers understand they are receiving A1 candidates from Apex so carriers can prioritize their review and buildout process increasing speed to market.

Monthly revenue varies based on the type of wireless service, number of carriers and building attributes. The average ranges of monthly revenue are as follows:

- Rooftop from \$800 to \$4,500
- DAS from \$2,000 to \$50,000
- SCN from \$100 to \$500 per month.

Our Team ensures a quality design and stealth installation so no harm can come to the rooftop or building. The capital outlay for building owner will be \$ZERO for all applications.

To learn more about how to maximize your wireless telecom building revenue, give us a call or send an email today.

ENGINEERING

Whether tackling massive coverage areas or congested signals environments, our Group makes the daunting doable. Utilizing sophisticated modeling, our engineers and mapping team target the problems and help customers visualize the solutions.

DAS & SMALL CELL

Densely populated areas can experience download overload. DAS and Small Cell solutions fix connectivity issues in large spaces. We help customers determine an appropriate solution based on space and capacity.

CONSTRUCTION

Evolution in infrastructure, transmission, and reception require construction that is solid, but flexible for future needs. Our Group fulfills that demand. Valuing quality and efficiency ensuring success at every stage.

PROFICIENCIES

Our Group is proficient in Design, Installation and Testing. Our expertise includes Professional Land Surveying, Geotechnical Services, Lease Exhibits, Construction Drawings, Structural Mappings, Post Modification Inspections, Structural and Mount Analysis, Mount Certifications, and PE Stamps in 48 states in the USA.

TECHNICAL EXPERTS

Our technicians, engineers and project managers quickly deliver affordable solutions with amazing agility and quality

SKILLED AT SYSTEM INTEGRATION

Adept at streamlining complex workflow processes and quality control programs as well as customizing legacy systems for integration with new technology.

EFFECTIVE MAINTENANCE SUPPORT

We ensure that all network components are fully functional and maintain backend systems and field assets. Our Team can also incorporate the customer's GIS data and design workflow as well as perform data verification and purification.
